

PhotonAssay™

PhotonAssay™ delivers faster, safer, and more accurate gold, silver and copper analysis.

PhotonAssay™ is a groundbreaking x-ray assay technology providing more accurate analysis results in hours, not days or weeks. It is an environmentally friendly alternative to fire assay on-site and in the laboratory.

Hitting samples with high-energy X-rays, Chrysos PhotonAssay™ causes excitation of atomic nuclei allowing enhanced analysis of gold, silver and complementary elements.

PhotonAssay's fast turnaround on high sample volumes provides critical operational information and drives optimisation through the entire mining value chain.

PHOTONASSAY™ DELIVERS:

- Enhanced analysis of gold, silver and copper in hours, not days or weeks
- Larger samples up to 500g provides true bulk reading
- Non-destructive analysis
- Significant environmental benefits
- Safer assay process for improved OH&S
- Can improve definition of reserves and resources
